Contents

1 March 15

1.1 Check your installation

Create a new Rmd file *File > New File > R Markdown*. And then click on Knitr, possibly by chosing the output format (i.e. Knit to. . .)

If needed, install required packages (e.g., `knitr`).

```r
install.packages("knitr")
```

1.2 Create own Rmd file

Various ways. . . Adapting the default Rmd or copy from the class GitHub.

1.3 Create class folders

In your machine, create a folder for this class. Within that folder, create a folder for your book.
